HUSNIDDIN JABBOROV

Frontend developer

About Me

I am a front-end developer and have experience working with technologies like HTML, CSS, JavaScript, React. I am interested in developing solutions that improve the user experience when creating web applications and sites. As a fast learner and always looking for new technologies, I focus on writing quality and efficient code for every project.

Education

(2024)

IT MENTOR
HTML, CSS, JS

(2024 -2025)

INTERNET
JS, React.js

Professional Experience

(2025)

FLASHCARD
Web Site

- I created an interactive flashcard site for users using HTML, CSS, JavaScript and React.
- I created a dynamic interface to add, edit and optimize the learning process of user cards on the site.
- I've enabled repeated learning by saving the user's learning through LocalStorage.

(2025)

HANGMAN
Web Site

- I created an interactive Hangman game using React technology.
- I developed game mechanics and offered users the opportunity to learn by guessing words.
- I have implemented the function of saving and restoring user progress using LocalStorage.
- O'yin interfeysini Speech Synthesis API va Speech Recognition API bilan boyitdim, bu esa foydalanuvchilarni ovozli kirish va chiqish funksiyalari bilan ta'minladi.
